

THE ELECTRICAL TELEGRAPH.

Yesterday was a kind of lightning's holiday, and there were all sorts of commingled fun and amusement at the telegraphic office.

The wire for the telegraph between this city and Lockport, has been up for some week or two, and after some preliminary trials, the telegraph was yesterday put in full operation.

Through the politeness of Mr. S. P. CARTER, who has charge of the operation here, we witnessed, for some two hours, the constant interchange of messages and answers, by this novel process.

However familiar one may have become, in theory, with this modern wonder, still, upon witnessing, for the first time, its actual, practical results, a certain sensation of amazement is almost inevitable.

Some of the incidents were not devoid of interest, even to the lookers on. A Lockport miller was told the price of flour in New York, and the price of transportation then charged to Albany, and was asked if he wished a boat sent him, to load. This he declined, at that price. He was then told "P. wants \$1000." Not understanding the initials, he quickly asked "Who wants \$1000 of me?" "Your agent, to buy wheat."

"Tell him I sent him that sum in a draft, this morning, by the packet boat." Then came the inquiry from Lockport, touching the price of sheep's pelts, in this market. This was stated by one present, but not a dealer, and his statement, with his name, transmitted.

The prompt reply was, "I won't take him—send for P." He was sent for, who confirmed the first price, and the querist, at Lockport, was then satisfied. A laughable incident, illustrative of our eternal desire for greater haste, must not be lost. A gentleman made an inquiry, and the reply came back, "You must wait till we can send to the Clerk's office." This was announced to the querist by Mr. CARTER, who informed him that it would probably take some ten minutes.

With a look of grave disappointment, the man exclaimed, "What! so long! then I must call again!" and he immediately left the office! Such is human nature, everywhere; and the desire in question is no more satisfied with the speed of lightning than with the slow progress of the toiling ox.

The wire, to Lockport, we should not omit to mention, is not wound, and isolated, from the atmosphere, and many supposed this must disturb the communication, particularly in wet weather. But yesterday was very rainy, and still there was no disturbance, whatever; not so much as a single touch, we believe, failing to respond. Lockport is henceforth—as the Atlantic cities soon will be—practically upon our city bounds; and as soon as the wires, upon this magic machine, shall have acquired the facility which a practice will give them, we may confer with our friends there with the same speed as the sentences could be mutually verified, were the parties together.—Buffalo Pilot.

THE HISTORY OF A POUND OF COTTON.—The following from an exchange paper gives a curious history of the progress of a pound of cotton. It shows how wonderfully interlaced are the interests of modern nations, and their several classes of population.

Whaling Cruises.—A gentleman, from New Bedford, assured us a few days since, says the Boston Journal, that one ship belonging to that place had made four successive and successful cruises after whales within eight years, and had brought off thirteen thousand barrels of oil. The crew consisted of thirty men, and during that time no spirit of any kind had been allowed on board as a beverage on any occasion, nor had any man died of disease, or been seriously sick, or met with any accident, except in one of the men in a boat, after a whale had been struck, was dragged out of the boat by the bight of the line catching around his leg, and hurried down with great velocity. While in this awkward, and somewhat novel predicament, he seized his knife, and cut the line—but to his disappointment it proved to be that part of the line which was attached to the boat! Finding himself still carried down by a force which he could not resist, he made another attempt, and fortunately succeeded in severing the line which tied him to the whale, when he ascended to the surface, puffing and blowing "very much like a whale," and was soon rescued by his companions, without having experienced essential injury.

Summary of the Treasury Report.—A Washington correspondent of the Journal of Commerce says in advance of the report of the Secretary of the Treasury, that the receipts from Customs for the fiscal year ending 30th June, 1845, will exceed \$27,500,000; from Public Lands, \$2,000,000; miscellaneous and incidental sources, \$163,998 96; making in all, over \$29,700,000. There was a balance in the Treasury 1st July, 1844, of \$7,257,579 64, which, added to the receipts, will make a total of over \$37,500,000. The expenditures for the same time were about \$30,000,000, which leaves a balance in the Treasury of above \$7,500,000. In the items, the expenditures under the direction of the War Department were over \$15,000,000, or more than one half of the whole expense of the government. The civil list will not much exceed two and a quarter millions of dollars, and the foreign intercourse not half a million. The Navy Department has exceeded above \$6,000,000; making upwards of \$21,000,000 for our active national defence.—Eye Press.

Speaking Cross.—You gain nothing by a harsh word. What if that boy broke the pitcher, or put his elbow through the glass, do you mind if he immediately left the office! Such is human nature, everywhere; and the desire in question is no more satisfied with the speed of lightning than with the slow progress of the toiling ox.

The wire, to Lockport, we should not omit to mention, is not wound, and isolated, from the atmosphere, and many supposed this must disturb the communication, particularly in wet weather. But yesterday was very rainy, and still there was no disturbance, whatever; not so much as a single touch, we believe, failing to respond. Lockport is henceforth—as the Atlantic cities soon will be—practically upon our city bounds; and as soon as the wires, upon this magic machine, shall have acquired the facility which a practice will give them, we may confer with our friends there with the same speed as the sentences could be mutually verified, were the parties together.—Buffalo Pilot.

THE HISTORY OF A POUND OF COTTON.—The following from an exchange paper gives a curious history of the progress of a pound of cotton. It shows how wonderfully interlaced are the interests of modern nations, and their several classes of population.

There was sent off for London lately, from Glasgow, a small piece of muslin, about one pound weight, the history of which is as follows: The cotton came from the United States to London; from London it went to Manchester, where it was manufactured into yarn; from Manchester it was sent to Paisley, where it was woven; it was sent to Glasgow, where it was finished; and from Glasgow was sent per coach to London. It is difficult precisely to ascertain the time taken to bring this article into the market, but it may be pretty near the truth to reckon it will take two years from the time it was packed in America, till the cloth arrived at the merchant's warehouse in London, whither it must have been conveyed 3000 miles by sea, and 920 by land, and contributed to the support of no less than 150 people, whose services were necessary in the carriage and manufacture of this small quantity of cotton, and by which the value has been advanced 2000 per cent. What is said of this piece is descriptive of no inconsiderable part of the trade.

Another of the Sufferers by the Stealton Found.—The remains of Mrs. Gilson, of Schefflety, one of the passengers lost in the steamboat Swallow, were discovered Thursday, as we learn from the Evening Journal, two miles below Athens, and though in a state of decomposition, they were identified by a watch with her name on it. The money she had with her was also found. The watch had stopped at ten minutes past eight, which was about the time the boat sunk.

The way we die.—The whig and democratic voices have fallen off some 40,000 from the presidential vote in Pennsylvania, yet the Liberty vote is about 200 larger than it was in the presidential campaign. This is a sort of negative death that the Liberty party die. It will kick terribly before it kicks its last at this rate. We have not yet the returns except for Canal Commissioner on which the Liberty vote credited is 2351.—Lib. New.

Another of the Sufferers by the Stealton Found.—The remains of Mrs. Gilson, of Schefflety, one of the passengers lost in the steamboat Swallow, were discovered Thursday, as we learn from the Evening Journal, two miles below Athens, and though in a state of decomposition, they were identified by a watch with her name on it. The money she had with her was also found. The watch had stopped at ten minutes past eight, which was about the time the boat sunk.

AMERICAN APPLES.

Robert L. Pell, Esq., of Pelham, Westchester county, has an orchard of twenty thousand apple trees, all bearing Newtown Pippins. By trimming and the application of the best manures, he has brought the fruit to unusual size and excellence. The apples are picked and packed in barrels without being rolled or jolted in carts, and so arrive in the very best order for shipment. Last year they were sold in London at twenty one dollars a barrel, and the merchant to whom they were consigned, wrote that the nobility and other people of great wealth had actually bought them by retail at guinea a dozen; which was some forty-five cents an apple.—Mr. Pell has from three to four thousand barrels of the apples this year, which are sold as fast as they arrive in market, at six dollars a barrel, and are all shipped to England. It is quite a business for one of our commission merchants to dispose of the apples of this noble plantation. The American Apple, take it all in all, is the most valuable fruit which grows on the earth. We undervalue them because they are so abundant; and even many American Farmers will not take the trouble to live like an English lord, though the trouble would be but very little.—N. Y. Journal of Commerce.

Rev. O. C. Comstock, has received and accepted a call to preach in the Baptist Church, in this village, for the year to come.—Cold-water Sentinel.

Florida.—Cabell, the whig candidate for congress is elected, to the surprise of both parties.

There is a temperance lady in Lynn who won't speak to a shoemaker, because he used a punch in his business.

A subscriber of the Cross and Journal, in forwarding by letter the pay for one year, in advance, says: I wish to pay for my paper in advance, for I never like to read an editor's paper so well as I do my own.

The number of students now engaged in mastering phonography at Aberdeen exceeds 350.

Ky.—The negro girl Emily, indicted for attempting to take the life of C. M. Clay's child by poison, has been tried and acquitted.—the evidence not being enough to support, though enough to create strong suspicion.

The Pennsylvania ship of the Line, co. \$200,000—more than has ever been expended upon all our lakes in making harbors—and it requires \$200,000 annually to keep her in commission.

According to the returns of the census just completed the population of the city and township of Monroe is 8,843

In 1840 the number was 2,598

Increase since 1840 947

THE UNIVERSITY PILLS.

SMITH'S UNIVERSITY PILLS have been extensively used by Dr. Smith in his private and public practice, and by many of his brethren in the profession, for whom he has prepared them; they have also been distributed generally in many of the Western States, and they now stand without a rival wherever they have been tried. They are usually well adapted to the purposes for which they are recommended.

1845. J. HOLMES & CO., WHOLESALE AND RETAIL DEALERS IN STABLE AND FANCY DRY GOODS.

IN THE HOPE TO OBTAIN RELIEF. Where it seems denied to the sick, we lay hold on straws like men. Thus it is that there are thousands who are the quicker hurried on the path of the public to the very best selected assortment of seasonable Goods.

W. A. Raymond's Store. No. 148, Jefferson Avenue, being one door above Bates St. and next door to the "Manhattan Store." The undersigned has taken a great deal of pains in selecting his goods to get the most reliable styles and desirable qualities and he is confident that his assortment particularly of such goods as are desirable for the country trade, is as complete as any in the city.

THE MISSISSIPPI CLARK'S SCHOOL. ANN ARBOR, MICHIGAN. MARY H. CLARK, Principal. CHARLOTTE A. CLARK, Vice Principal.
